

LIFESAVING SOCIETY

Symposium on the Design and Operation of Healthy Swimming Pools

What is this?

In this one-day Lifesaving Society symposium, experts will bring the most up-to-date information on the design and operation of healthy, safe swimming pools.

Who should attend?

Swimming pool operators, environmental engineers, construction supervisors, architects, and aquatic supervisory staff who want information on the design and operation of aquatic natatoriums.

When & Where?

Wednesday May 3, 2017
9:00 am – 4:00 pm
Coldwater Room
Lifesaving Society Headquarters,
400 Consumers Rd., Toronto, ON

Cost

Registration \$175 (includes HST) .
Light lunch included.

To register, contact Ann Palmer at
the Lifesaving Society;

Tel: 416-490-8844
Email annp@lifeguarding.com.

*Register soon. Space is limited!
Only 50 spaces available.*

Ryerson University- Indoor Air – a Research Study with Solutions

This session will present a review the results of a research study into mold and indoor air quality assessments at public indoor swimming pools. The findings from the research study will be used to illustrate current concentrations of mold in indoor public pools and what control measures need to be put in place to minimize presence of mold and the enhancement of air quality.

Speakers: Nathalie Vallieres, Moderator, Milena Agababova, Shivangi Patel, and Kelly White, Ryerson University and Conny Smith, Supervisor of Aquatic Operations, City of Cambridge

Improving Design: maximizing comfort & safety in your facility

Whether you are renovating an aging facility or planning a new facility, improving the safety and comfort for your community will be one of the top priorities. This session will explore learning the language of design and recognizing good health and safety planning will be helpful in the dialogue. In this session we will help you understand the detailed design process and how to get the most of it. Get insights on the most common problems and what can be done to fix them.

Speaker: Jay Lim, Senior Architect, Perkins+Will

What is this?

In this one-day Lifesaving Society symposium, experts from United States and Canada will bring the most up-to-date information on the design and operation of healthy, safe swimming pools.

Who should attend?

Swimming pool operators, environmental engineers, construction supervisors, architects, and aquatic supervisory staff who want information on the design and operation of aquatic natatoriums.

Public Health- the Next Decade

This session will focus on various public health-related issues affecting aquatic facilities. We will examine the innovations being made in the public pool area by Toronto Public Health and also look to the future of public pool enforcement and education. We will provide one likely outcome of the Modernization of Regulation - the need for a Pool Safety Plan. A sample model plan will be shared so operators can get a head start on this project.

Speaker: Mahesh Patel, Manager, Toronto Public Health

Lifesaving Society Update

We will review some of the new initiatives of the Society and how these will impact the operation of public aquatic facilities.

Speaker: Gary Sanger, VP Aquatic Safety Management Services

Point Counterpoint – Those Legal Oxymoron's

This Lifesaving Society presentation session will examine how recreation professionals and members of the legal community see the world differently. In this session we will discuss the steps you should follow to ensure your operation is bullet proof from litigation and the consequences you and your corporation might face if you fail to follow these steps. Discussion topics will include: Standard of Care, complexity of aquatic civil cases, settlement factors, legal strategies and tactics.

Speakers: Gary Sanger, VP Aquatic Safety Management Services/ City of Toronto, and Robin Squires, Borden Ladner Gervais LLP
